- By Mail.

When you provide a check as payment, you authorize us to either use information from your check to make a one-time electronic fund transfer from your account or to process the payment as a check. You will not receive your check back from your financial institution.

Understanding Your Bill

***Full Service** applies to customers who elect not to participate in Retail Choice and continue to receive both the supply and delivery of electricity and/or gas from Orange & Rockland.*

***Retail Choice** applies to electric or gas customers who purchase their energy supply from an alternate energy provider rather than from the utility company.*

Basic Service Charge covers the cost of metering (residential only), billing and other customer services. This charge may include the cost of a minimum amount of usage that is billed.

Billing Charge reflects the itemized portion of the basic service charge related to issuing bills, including printing, mailing, and processing of customer payments.

Total Delivery Charge reflects the cost of delivering energy through our lines to your home or business.

Energy Cost Adjustment recovers costs related to O&R's prior obligation to purchase energy from non-utility generation sources and other purchase agreements that ensure service reliability. **Gas Supply Charge** reflects the monthly charges the company pays for purchasing gas supply on behalf of full service customers.

Government Surcharges include New York State and local taxes, such as the Gross Receipts Tax, and local village taxes, where applicable.

Revenue Decoupling Mechanism (RDM) Adjustment is intended to minimize the financial impact to O&R caused by lower sales as O&R implements energy-efficiency programs that help customers reduce consumption. Mechanically, an RDM functions by comparing actual versus authorized revenues and either crediting or collecting any differences from customers in a subsequent period.

Transition Adjustment Charge recovers costs associated with customers making a transition to competitive service providers for electric supply, billing and metering services.

Metering Charge (non-residential customers only) reflects costs associated with metering, meter reading and data management.

Supplier's electric or gas charges reflect the cost of energy supply.

This section appears on the bill only if the customer receives electric and/or gas supply from an alternate energy supplier.

Monthly Gas Adjustment or Adjustment Charge recovers costs of a number of items related to delivering gas to O&R customers such as balancing charges and pipeline refunds.

Forecast Market Supply Charge and Market Supply Charge

Adjustment recovers electric supply costs incurred by O&R on behalf of its full service customers. The Forecast Market Supply Charge reflects market prices, while the Market Supply Charge Adjustment reconciles differences between prior period electric supply costs incurred by O&R and recoveries from its customers.

Merchant Function Charge for full service customers reflects certain costs associated with procuring electricity, and procuring and storing natural gas, as well as costs incurred by the company related to the credit and collections activities and uncollectible accounts.

NY Assessment recovers fees imposed by the state as authorized under Section 18-a of the Public Service Law.

SBC Charge: The System Benefits charge recovers costs associated with clean energy activities conducted by the New York State Energy Research and Development Authority (NYSERDA).

Hourly Commodity Charge reflects the cost of supply for customers subject to mandatory hourly pricing.

Capacity Charge recovers costs the Company pays for the capacity it purchases from the NYISO.

Reactive Demand is intended to encourage certain demand billed customers to reduce their use of reactive power by charging for a power factor less than 95%.
